

# CYCLIOCYRILLIUM

Porter, Meisterfeld & Knoll 2003  
p. 415

## Genus CYCLIOCYRILLIUM new genus

*Type species.*—*Cycliocyrellium simplex* n. sp.

*Other species.*—*Cycliocyrellium torquata* n. sp.

*Diagnosis.*—Bulbous to pyriform VSMs with a circular aperture and uncurved “neck”; angle between the apertural plane and the aboral axis ~90 degrees.

*Etymology.*—From the Greek, *kyklios*, circular, and *kyrillion*, jug with a narrow neck; with reference to the circular aperture of these VSMs.

*Discussion.*—The two species vary with respect to modification of the apertural margin.
