

TRIANGUMORPHA

Sin and Liu 1973

Triangumorpha Sin et Liu gen. n.

Type species: *Triangumorpha striata* Sin et Liu gen. et sp. n.

Diagnosis: Theca triangular or roundly triangular, of different sizes; thick; surface smooth or rough, or with rib-like ornamentation. Trilet absent.

Comparison: This type of outline looks like the triangular spores of pteridosperms, but is short of trilet.
