

ARCHAEOFIVOSINA

Naumova 1961

ARCHAEOFIVOSINA Naumova 1961, p. 113: "Vesicles round to ellipsoidal, of varying size. The surface of the central portion of the vesicle is smooth to scabrate or reticulate; a thickening in the shape of a cingulum surrounds the central part of the vesicle". (A. simplex: Naumova 1961, p. 113, Pl. 3:11).-
