

DEUNFFIA

Downie 1960

DEUNFFIA Downie 1960, p. 198: "Vesicle body subspherical to ellipsoidal; the long axis of the body is parallel to the axis of the vesicle. One pole is ornamented by a spine or process which may be simple, distally branched, or bear filose sculptural elements. The other pole is smooth. Vesicle wall smooth or microsculptured. Vesicle symmetry bipolar, hemimorphic; symmetry axis longitudinal". (D. monospinosa: Downie 1960, p. 198, Pl. 1:8).- text-fig. 3:57.
