

LEIOMARGINATA

Naumova 1961

LEIOMARGINATA Naumova 1961, emended by Umnova 1975, p. 41: "Acritarchs with a rounded, sometimes oval outline. The vesicle wall is relatively thick, uniform and may or may not show shallow folds". (L. simplex: Naumova 1961, p. 114, Pl. 3:9).- text-fig. 3:125.

We fail to see how in the world one could tell *Leiomarginata* from *Leiosphaeridia* of which it surely is a junior synonym.
