

YALISPHAERIDIUM

Gao 1986

Diagnosis: Vesicle spherical to ellipsoidal in outline, hollow, wall single layered or bi-layered, punctate-microverrucate, excystment via one or other pylome positioned at opposite poles of vesicle. 1

Remarks: *Yalispheeridium* gen. nov. is distinguished from *Leiosphaeridia* Eisenack and *Gneudnaella* Playford (1981) by its structure and ornament.
