

Discoaster berggrenii Bukry (1971) *berggrenii* Wei (2003)

Pl. 1, figs 4-6

Figs 4-6 *Discoaster berggrenii berggrenii* n. subsp. Sample CH30-43-2, 0.91-0.94m; 5, 6, same specimen 5, focus on the inter-ray star on the distal side, 6 focus on the knob on the proximal side.

Description: A subspecies of *D. berggrenii* with free ray length which is longer than the diameter of the central area.

Remarks: This subspecies has a longer stratigraphic range than the subspecies *Discoaster berggrenii extensus* n. subsp. (see below).

Holotype: Pl. 2, fig. 6 of Bukry (1971).

Type locality: DSDP 3-9-3, 75 cm, Gulf of Mexico.

Wei, W., 2003. Upper Miocene nannofossil biostratigraphy and taxonomy of Exxon core CH30-43-2 from the Gulf of Mexico. *Journal of Nannoplankton Research*, **25(1)**: 17-23.
