Discoturbella ROTH, 1970

Description:

Diagnosis: A coccolith consisting of one elliptical shield and high central cupula made of a whirl of elongate crystals.

Remarks:

*Naninfula* PERCH-NIELSEN is distinguished from *Discoturbella* n. gen. in having a perforate cupula. *Cepekiella* n. gen. has two shield and a much lower cupula than *Discoturbella* n. gen.

Type species:

*Discoturbella moori* ROTH, 1970.
