

**70. *Dodekapodorhabdus* Perch-Nielsen (1968) emend. Varol & Girgis (1994)**

**Type species:** *Dodekapodorhabdus noeliae* PERCH-NIELSEN, 1968.

**Synonym:** *Dekapodorhabdus* MEDD, 1979.

**Emended diagnosis:** In the present study the genus *Dodekapodorhabdus* is emended to include species with ten openings (as in *Dekapodorhabdus*) or more, in a single ring in the central area. This genus was originally described as having twelve openings in a single ring in the central area. The number of openings above ten in a single concentric cycle is considered to have no value in defining genera.
