
**Derivation of name:** After Dr. Siani Pearson (Cardiff), member of the TDP support team.

**Diagnosis:** A small species of *Duocameratus* that is irregularly pentagonal and house-shaped, with an almost flat base/proximal plate and a pointed ‘roof’. Bright points mark where the septum dividing the cavity joins the rim. These bright points are situated in the middle of the base and the peak of the ‘roof’.

**Holotype:** Pl. 13, figs 60, 61.

**Holotype dimensions:** H = 3.08μm, W = 3.52μm.

**Paratypes:** Pl. 13, figs 62-65.

**Type locality:** TDP15, Maghreda Swamp, NW of Kilwa Kivinje, coastal Tanzania.

**Type level:** TDP15/5-1, 10cm; UC6b, Early Turonian.

**Occurrence:** TDP15, Early Turonian (UC6b).
