

115. *Hayococcus Jafar* (1983)

Type species: *Hayococcus floralis* n. g.

Derivation of name: Generic name after W.W. Hay of U.S.A. Specific epithet taken after its flower-like appearance.

Generic description: By using the single polarizator, the nannofossil exhibits a faint octagonal outline containing two unequal pairs of low and high relief areas. Under crossed nicols, the bright quadrants are visible.
