

187. *Quadrum bengalensis* Burnett (1997)

Pl. 1, figs 26a-b

Derivation of name: After the Bay of Bengal from which it is described.

Diagnosis: A form of *Quadrum* which has one cycle larger than the other. The larger cycle appears to be slightly flared, and the elements slightly separated from one another.

Remarks: Differs from other *Quadrum* species with four elements per face in being distinctly wider at one end.

Holotype: Plate 1, Figures 26a-b (XPL); Neg. # UCL-5763-25/24.

Holotype dimensions: 4.4µm ?long, 3.0-3.9µm ?wide.

Type location: DSDP Site 217, Bay of Bengal, N Indian Ocean.

Type level: Sample DSDP 217-17-1, 86-88cm, uppermost Maastrichtian, CC26.

Range: Upper Maastrichtian.
