**Sollasites** BLACK, 1967

**Description:**

Diagnosis: Elliptical coccoliths consisting of two shields with a large elliptical central opening spanned by one cross-bar along the shorter diameter of the ellipse, and several bars parallel with the longer diameter.

**Remarks:**

*Sollasites* is represented by a single species, which does not resemble any other known coccolith.

**Type species:**

*Sollasites barringtonensis* BLACK, 1967.
